

The Keynote

Newsletter of FISTS CW Club, the active chapter of the
International Morse Preservation Society

“Accuracy Transcends Speed”

- Further the use of CW
- Encourage newcomers to use CW
- Engender friendships among members

“When You’ve Worked A FISTS , You’ve Worked A Friend”

FISTS CW CLUB
NORTH AMERICA CARIBBEAN AREAS CENTRAL & SOUTH AMERICA MEXICO, HAWAII

GREETINGS

I trust the absence of the January Keynote has not inconvenienced anyone. It is nice to have a bit of a rest and of course, given the chaotic postal situation during the Festive period, it is just not practical to try and squeeze two Keynotes in.

The first 'real' snow of the winter arrived just before the rush hour on the 2nd week in January. It was moderate (only about 2 inches) but it glued up the road between Blackburn and Bolton for at least 10 miles. Heaven protect us from a real snow fall because if this is an example of what can happen we would end up having the Royal Air Force flying in food bundles. Hi.

On the 17th of January, Ivy clocked up 75 years whilst on the 20th, the old man with the scythe deposited 71 candles on my jam butty. Neither of us have anything to regret but I do miss a few things - teeth for example. There's one good thing though. I can laugh at the television advertisements for hair and dandruff treatment and just think of what I must be saving.

I have been asked to remind you that QRL? is not a license to transmit on a frequency regardless. Happily these occurrences are few but we do have a small number of members who call QRL? and simply do

not wait to see if there is a response. One member is QRP and reports having missed quite a lot of juicy DX in this way when the target station was crystal controlled. This is quite common especially in the Eastern European countries where hand-rolled kit is the norm and crystals which would place the transmission within the QRP segment are just not available. Please do check for replies to your QRL? but our thanks to the guys who do at least use it.

Talking of QRP, I have found a fair amount of QRP activity from the US. It may be the richest country in the world but devotees of the flea power brigade clearly derive immense pleasure from the challenge. One station running only a single watt from Rhode Island enters my bandpass regularly and it is always a pleasure to dig him out from his 599+ QRO neighbours. How often have I been showered with bouquets from new members who simply cannot believe that their US sourced QSL has arrived within a couple of weeks. Hi. The praise is mis-directed however... it is Bob, G0FRL, who is responsible for this well oiled machine. His post no longer arrives via his letter box. It comes in mail bags and when your cards are properly sorted in prefix/suffix order, it helps enormously. We are now sending 4 or more bundles a month to the US bureau at a cost of some £10.00 a shot and the same thing is happening in reverse.

We had a couple of very mild days prior to the the snow and it fooled a lot of the local wild life into believing that spring had arrived. I disturbed a pair of squirrels who were seemingly intent upon setting up home and Tammy drew my attention to a hedgehog that had absolutely no business grubbing for worms. Such variations also apply to the bands and DX signals loud and clear have been heard on 10M when my favourite 15M was near devoid of signals. I blame it on the US senate and all the hot air they are creating because the boss has been discovered to be a mere human.

ANNUAL GENERAL MEETING

The date for this has been provisionally set as the first Tuesday in March. Nominations for offices should be in my hands before this date.

As usual, the venue will be the local watering hole (The Cemetery Hotel, Cemetery Rd, Darwen) at 1930 and with the proviso that they buy their own beer, visitors will be most welcome. Hi.

Bill, G2AKK, left a void which would have severely depleted the committee but Mike, G4PSE has kindly

offered to take up the post and, failing other nominations, the committee will be asked to opt him to our number and accept him in the post of Chairman. The accounts have been completed and will be presented at that time following which they will be posted in Keynote as usual.

CHIEF MORSE EXAMINER

Many of you will be aware by now that Roy, G4SSH, together with his deputy, G4ZPG has resigned. In his blanket letter to all examiners he says:

"It is with deep regret that I have to inform you that I have tendered my resignation as Chief Morse Test Examiner. Enough has been said regarding the rights and wrongs of the present situation and I do not wish to add fuel to the polarised arguments. Sufficient to say that I find myself totally opposed to some of the recent statements issued by the Society and I am no longer invited to contribute to meetings on Morse testing policy with the R.A. I therefore feel that it is in the best interests of the Morse Test Service if I step down and let a new person take over who will have the enthusiasm to organise the proposed new interim Morse tests."

I am sure that my disgust at the situation which brought about this action is echoed if not by all, then surely a large percentage of the club.

LOST AT SEA

FIST #0001 having had a win on the lottery, decided a cruise would be just the thing. Not a very large win so, a cargo vessel supplied the berth providing he shared with the Radio Officer.

This has very little to do with the story except that it seems the only possible answer to finding himself laying face down with sand up his nose on a deserted island. He struggled to his feet. Apart from a large forest of mixed trees banked by a high cliff, there was nothing. First a shelter - not a difficult task - a few small caves overlooked the beach, various items of wreckage lay about the beach together with a box from the wireless cabin, an old bicycle and a chest of drawers containing soggy papers.

Now some food. A plentiful supply of fruits were on hand and later perhaps some fish from the sea with perhaps shellfish from the rocks. One good thing, it was warm; a blessing. Now he could get his clothes dry and take stock. Come morning, awakened by the surf breaking over the rocks further up the beach, decided to see if he could get to the other side of the Island since so far there had been no sign of passing

ships on this side.

Making his way through the trees, helping himself to various kinds of berries, life seemed a little hopeful. However, after trekking from one side of the cliff to the other he seemed to be trapped in a cove with the cliff being too steep to climb.

Back at the beach, some very pleasant days spent fishing and dining well, The lens of a long lost spy glass providing the means of making fire. Looking through the tool box from the radio cabin, an old transformer provided a few hours occupation as he stripped a winding to provide some 160 metres of wire. One end was secured by a small rock placed as high as he could climb with the other end taken down to his shelter. Also from the box, a diode and a cigarette tin.

Things were looking up. The aerial fixed to the diode and more wire wound many times round the cigarette tin was returned to the metal stem of a bicycle pump buried in the sand for an earth. The only earpiece was at the bottom of the sea with the ship but he found some stiff paper from the chest of drawers which he made into a fine cone. A pin fixed to the point of the cone and precariously balanced over the upturned tin produced faint speech and music.

Not all is lost he thought. I will get out of here yet. On the old cycle was a dynamo and the tyre, though slightly deflated, would turn the dynamo and a millamp meter though damaged proved that there was some output from the dynamo. Another diode from the tool box in line with the dynamo and hey presto - a steady though low current showed on the meter. Well if those QRP chaps can do it he thought, then so can I.

Making and breaking the flow of current by striking the bare end of the wire on the bicycle frame he blessed his knowledge of Morse as he called CQ FISTS CQ FISTS. This became the daily routine for months until one day, around the edge of the cliff came a boat with two figures. They could be cannibals - should he hide? As the boat drew closer he saw they were in western dress and he stood up, waving enthusiastically.

"Ah, there ee be" said one of the strangers in a rich cornish accent. "We been looking for ee for days... YOU BE PLAYING 'ELL WITH OUR TELEVISION."

This (with a little judicious editing) from the hyperactive imagination of G0FVS

G0UQF

G0UQF. "I would like to apologise for losing my rag with two gentlemen on 80m - Jan 6 1999. I had waited over half an hour for them to finish their QSO so that I could call CQ on the frequency. One of them responded with 'QSY' but the frequency was quiet my side so I gave another call. The other station then called me a B.... FIST operator which caused me to lose it and I called CQ for about two minutes. I appreciate that this is not in the spirit of Amateur Radio and though I would like to say it will not happen again, with my short fuse I could not do so." I thank you for your candour Grant and I know it sometimes becomes frustrating but why wait so long for a particular frequency? 80m in particular has become a no-mans land with our preferred 35580 usually being occupied by some form of digital transmission. I find the gang as low as 35520 having migrated LF in search of a clear spot and, indeed, I do the same myself. It is unfortunate that 80m is seen as a 'shared band' by the RA and this generally means that operators from fishing vessels chatting to their wives on shore are regarded as higher priority than the Amateur operator. The source of many packet type transmissions is unknown and on the lower end of the band you can hear individuals pertaining to be officers of Interpol using CW to exchange information. This in particular I have to regard as frivolous. CW is a great mode but must be at the bottom of the pile in these modern times when it comes to moving large masses of data and if these are indeed Interpol officers then they must be naive indeed to exchange their information in plain language CW when a telephone line and high speed modem is much more the appropriate technology. This picture makes 80m sound like a battlefield but to Grant and others who must at times feel like second class citizens, that is exactly what we are as seen through official eyes. But at least we are infinitely more responsible than some of the current users of the band so we live in hope that this may some day be recognised by the authorities.

SILENT KEY

It pains me to advise you friends that G2AKK (our chairman) passed away Jan 10. The manner of his passing fills me with the hope that I may be permitted to leave this world in the same way. At about 1700, Mike, G4PSE, was chatting to Bill who even at that time was perfectly lucid. Bill stood up to answer a call of nature and simply left us. Bill was 87 years

old and during the war served with the RAF where he employed his talents at foot-printing radio transmissions from the Luftwaffe. Some of you may remember that in 93, he was honoured by the Labour conference and presented with a National Merit award by John Smith.

CHANGE OF CALL

GW7EXW, Tom, whose son was tragically killed in a road accident a couple of years ago has passed his CW test and adopted the call GW0JGJ which belonged to his son.

The Hawaii FISTS QSO Party

On Saturday, January 30th, 1999, to 1900Z. Mike Burger, AH7R, hopes to travel to contest station KH7R and make use of the big tower and stacked beams on 15 meters to provide greater punch than his home QTH of two Hustler whips and 20 watts on a condo landing in the urban Honolulu area. He will be near 21.058 Mhz. Location is on Oahu in Grid BL01, adjacent to Waimea Falls Park.

Jim Reid, KH7M, will be using his home station with a new Force 12 beam on Kauai, also grid BL01 but about 90 miles west on another island. He will be near 14.058 on 20 meters.

By activating two bands simultaneously from two stations about 100 miles apart, we hope to increase chances that FISTS members can find and work one of us.

Hopefully we can hand out a few FISTS numbers to people working on the FISTS WAS award where Hawaii can be somewhat hard to find.

Neither of us claims to be a brass pounding speed demon or psycho world class CW contest operator, so mellow patience will be appreciated.

www.chem.hawaii.edu/uham

ON4BBA WHERE ARE YEU

Hello Geo,

We never had qso, no problem, what not is can still come...

I would like to take the opportunity to wish you and yours all the best for the new year, and may the little pains go away and the little nice things be twice as big...

Also I would like to announce a little adventure undertaken by non X-peditioners. My local club of which I am secretary is going to be active from EU-64 Island of Yeu (ille d' Yeu) EU-64 is mostly known from ille Noirmoutier, but Yeu is part of that group. There are

nine participants and we will be on the island from 17 July till 25 July, and working on all bands, CW 40%, SSB 40%, RTTY 20%

An effort will be done to give qrp a chance on working EU 64.

Our DX-pedition will not be the most formidable one, but even the greatest had to start from nothing...

A big thank you in advance FISTS 1849

COLOURED QSL CARDS

I am sorry people. I have done a couple of batches of these and frankly, it is a pain in the pancreas. The problem is that I have to stand at the printer feeding one sheet at a time for anything up to 50 minutes for the usual order of 200 cards. The printer is simply not man enough to cope with a batch of A4 boards and has a disturbing tendency to grab up to half a dozen in one gulp causing me to go into a flat spin. Remember that there is no personal profit in this for me and I simply cannot afford the time necessary to process them under these conditions I will however seek advice about the likely cost of bulk printing the coloured logo so they can be fed through the laser in the same way as the standard club QSL. It could well be that a colour laser printer would be the answer but have you seen the price of 'em? I do not feel that we can justify such expenditure on what is purely a casual basis. I have a couple of boxes left yet of the yellow QSL cards so I will check when these get low.

SUBS

For the past few months, we have been subject to a change in Postal rates where the differential between the EEC and the rest of Europe has been rounded off to a single rate. Although this represents a small reduction in terms of our non-EEC members, these are few in comparison and it is necessary to adjust subs. As from 01 Jan 1999 therefore, subs for Europe will be common at £7.00.

VP8 TRIP

G4YRS, Gerard, tells me he will be visiting the Falkland Islands between the 14th and 17th March to conduct a survey. He is hoping to be able to activate VP8/G4YRS during this period so mark your diaries. He will not be taking any gear with him but is advised that there are facilities at Mount Pleasant.

Preferred operating times will be after 2100z (hopefully for a three hour period) and perhaps 0900z for one hour.

His target frequencies will include 14.058 in addition
ISSUE 2 1999

to 14.170 and he is particularly looking for RSARS, RAFARS and of course FISTS.

SPECIAL ACTIVITY STATIONS

Dear Geo.,

We at the Dragon Club on Anglesey will be operating from the old GLV Site at Nebo near. Amlwch, Anglesey. With the callsign GB0GLV on the 10th & 11th April 1999. (There may also be some activity from the beginning of the month, see web pages).

The Liverpool & DARS are operating GB2GLV from Seaforth L/Pool. (s/m ?G0TDK?)

For your diary:

International Marconi Day is From 0001 UTC. to 2359 UTC. on

Saturday 24th April 1999.

Lighthouse/ lightship activity weekend is from 0001 UTC. Saturday 21st August 1999 to 2359 UTC.

Sunday 22nd August 1999.

Hope this is of help. Thanks for all.

Vy 73 de Martin GW3PRL (1315)

Email kindly provided by John GW3VVC DARS
Chairman.

Restore 0660, Peter who is now GM4WCE
 Whew! I don't think we have ever had so many newmems to report in a single Keynote before. Please note that although we do not re-cycle FISTS numbers, we apply our own identity to SWL members for convenience and as these are promoted to the active list, their SWL number is re-used. On the list at this time we had SWL2, 3 and 4 hence the allocation of SWL1 to Alan.

At the time of writing, the total active list is 4217. This has pushed the printed listing through 13 pages to 14. As you will appreciate, this is placing quite a burden on the printer to say little of the stationery stock so those members who have access to the internet are urged to use the web page for updates. Nancy continues to bombard me with new US members in addition to a seemingly constant stream of callsign changes due to the "vanity call" policy. To date, no further increase is reported for the antipodean brigade but this will change as local FISTS activity occurs both in New Zealand and Australia.

THE OLDHAM RALLY

Being bereft of transport, I leaned upon the generosity of my good friend Frank G4XHZ (a committee member) with the result that when we turned up, there were four members of the committee present in the

shape of G0FRL, G0JWB, G4XHZ and myself. Members signing in included G0MRM, M0BNT, G0WHS, M0AQQ, M0BOS, M0AXJ, G0VBT, G4MZS, G0LBT, M0ANL, G4PPG, G0EOK, GM4WCE, M0BIH, M0BUS and G0ORS (this in the order of signing in) and we recruited 9 new members and one re-joined.

A SAD OCCASION

I attended the service for G2AKK and on entering the church, received a big hug from Pauline, Bills' wife. She said nothing but pointed to her jacket and there on her lapel was his FISTS badge.

Later, the congregation was addressed by Mike, G4PSE who attended the organ to send the following: G2AKK de G4PSE = Bill = thanks for everything = There should be no problem with the celestial antenna = path good = QRM nil = 73 de DARC es FISTS
 With all that, I am sure you will appreciate that I was deeply moved; choked in fact.

OVERSEAS MBRS AND LISTINGS

At my suggestion, Bob has asked Taro (JR0QWW) to download the listings from one of our web sites. If DX members are known to be on the net then we will adopt this policy because the cost of sending an additional 7 pages of data snail mail is (to say the least) excessive and tends to leave us with a deficit over the subs. If things continue as they are in Japan then it will be policy for me to seek a manager and institute a JA chapter in the same way as we have done with ZL with the advantage to such members of course of very much reduced subscriptions compared to that which we are obliged to impose on DX stations due to the postal costs.

It is also to our mutual advantage in respect of QSL cards since batch postings are far more economical than inserting QSL cards individually with the Keynote.

THE LIVERPOOL DARC

I received page 1 and 2 of a 6 page circulation from the above and judging from the content, they seem to be a highly inspired group offering Novice, Class B and Class A licences including full training in each case.

I am offered <http://wkweb5.cableinet.co.uk/jonesy/Radio.htm> and included was a letter to the RSGB: "We, the members of the Liverpool & District Ama-

teur Radio Society wish it to be known that we do not agree with the lowering of the standards or the abolition of CW as a qualification for an Amateur Radio Licence.

Our local Liaison Officer was unaware that the Chief Morse Examiner and his deputy tendered their resignation on the 7th of November 1998 and not a word has been spoken or written about this. Is this a subjudice or subterfuge? We consider that these two officers have done a sterling job over the past ten years and we want to know if the RSGB intends to reward them.

The RSGB has lost more than 30 Morse Examiners and 4 complete teams yet this fact has not been brought to the attention of members. WHY?

Qualifications in Amateur Radio are being cynically diluted in a determined effort to attract newcomers who lack the motivation and interest necessary to engage in self-training in basic radio communications. This can only lead to further resignations from the RSGB"

OOPS

Otto, LA1IE, drew my attention to the pseudo stereo arrangement from Sprat in Keynote last month. I simply re-drew it as shown but Otto points out that there is a dead short across the output.. and so there is. I'll see if I can get an update on this one. The caps incidentally are 2.2 micro Farad.

OOOPS AGAIN!

Bob has had a few mis-directed cards returned but is anxious to point out that when he is dealing with hundreds of 'em during the month, it is quite easy to slip two cards which are kind of stuck together into a selected pile.

ODDS N' ENDS

Bamboozling the Bankers

I have been obliged to return a few cheques from members who mis-understood re. the price of QSL cards and have bunged £2.00 more than they should have done. Until we run out of pre-printed boards, the price remains at £5.00 per 100 and £8.00 per 200 and unless there is a significant increase in cost of the stock, this is likely to remain so for quite a long time. Also (again on the subject of money) there still seems to be some hesitation in respect of cheques. Unless otherwise specifically stated, ALL cheques should be made

out quite simply to 'FISTS'. I invariably end up having to educate the bank tellers in the strange ways of Amateur Radio to explain that a cheque made out to 'G. Longden' is actually directed to 'E. Longden' and should be transferred to FISTS.

Those Donations

For a number of members, I know without asking that a cheque for £10.00 represents £5.00 subs and £5.00 donation but there are a many of which I am not sure so the member is credited with 2 years subs. In either case, it would be helpful if you will specify exactly what any extra money is intended to be used for.

We run on a virtual shoe string of course so all donations are very much welcome because without them it is just possible that we may have to cease supporting a number of stations who are currently sheltering under the financial umbrella of the club.

White Stick Status

A reminder that if you fall into the category of White Stick then you should let me know so you can be placed on Romas' talking news letter. Similarly, if your vision has deteriorated to such a degree since being a members or if you know of members who should be thus classified I would appreciate the advice.

Re. Clarry

For his friends, I understand that Clarrys' disabled son is using his Dad's rig. Being permanently horizontally polarized, makes life difficult and his ability to send CW is restricted but I gather he copies at a fair old rate of knots. Wonder if he is thinking of adopting Clarrys' old callsign?

Nominations

By all means drop me a line or give me a bell if you wish to make a nomination but the application form 'for your friends' issued on joining is not a one off. Give me the word and you will receive more app forms in the post. Very much at the top in terms of new members is Chris, G3TUX who simply photo-copies app forms and distributes them on his stand at rallies.

FINALE

Brrrr. That spell of mild weather has turned tail and fled in the face of the wintry stuff we are getting at

E-mail

present. Our Scandinavian friends may smile but we are simply not used to sub-zero temperatures here. In the same way, the openings on 10 and 15m have given way to loud silences on those bands but we all keep our fingers crossed for improved conditions. Meanwhile, activity on 40 and 30m is still high so hopefully we will be seeing you there.

Some of the more recent members will find a sample QSL card with their news letter because Bob ran out of 'em at the time of posting their documentation.

Our growth has caused something of a bottle neck on .058 so do please search round and I am sure you will be rewarded .

73/88 for now my friends. Have fun and stay sober.

Geo.

FISTS CLUB DOWN UNDER

Local News – February 1999

12c Herbert Gardens, 186 The Terrace, Wellington
6001, New Zealand

Tel: 0-4-473-0847 Fax 0-4-473-0848

e-mail: sir_lancelot@compuserve.com

Welcome to 1999. I'm sorry that this is a bit thin this month but there has been a shortage of inwards mail from members, on which we rely largely for local news

ZL2CD-BILL-9004

We are sorry to report that Bill has been in and out of hospital recently. He is home now but making only slow progress on the way to recovery. We wish him and Nita vy 73 and hope that we will have more favourable news to report in the next issue.

Membership List

As promised in our last newsletter we are enclosing a revised membership list up to date at the time of printing. Lists of changes will appear as usual in forthcoming newsletters.

QSL Cards

Several members have been busy, judging by the number of incoming and outgoing cards received here. Remember that outgoing cards are usually posted on the first of each month, unless the envelope gets too fat and heavy. Incoming cards are usually mailed with newsletters.

From time to time we send out information of interest by e-mail to those members who have advised me of their e-mail addresses. If you have the facility and haven't told me your address, just send a message to us at the e-mail address in the letterhead and I'll add you to the list. It's also a good means of sending information to me for inclusion in the newsletter.

Member's Correspondence

ZL2BIL-Bill-9003 writes:

FISTS members worked: George W4GEO. Others: Edgar G4UJI (hard work on 20M), Bob KH7EX (15M), Sei JO1LJG (20M), Rainer T33VU (Rainer is DL2MDZ doing a bit of island hopping) and, of course, ZL9CI (Fantastic number of QSO's according to the web site, but log server has been down). Haven't done a lot of work over the holidays, just enough to keep the CW ticking over.

Editor's Activities

One of my main gripes about DXpeditions is their failure to give their call. One can hear a pileup without knowing who is

the cause of the excitement. I certainly wouldn't bother trying if I didn't know whether it was a country I hadn't worked before. I have even heard stations who managed to break into a pile up and ask who they were working! I was very impressed with the operating standards of the ZL9CI boys on Campbell Island who in thanking the departing station gave their call sign and a clear indication of the split they were using. I was lucky to be able to work them on 10, 14, 21 and 28 MHz. No doubt the fellows will be in great demand to tell their story to branch meetings over the next few months.

I have made additions to my logging program (LogWin V.3.05) which now tells me whether the station I am working is a FISTS member. I used the club membership list and a bit of editing using Excel and Word 6 to add the information to my log's file. I have also added the e-mail list. The only trouble is that I now have the equivalent of an extra membership file to keep up to date! If anyone is interested to know the ins and outs of the procedure I'd be happy to correspond.
